EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

The application has been amended as follows:

The Examiner has not amended the IFW application.

Drawings

The drawings as originally filed have been approved.

Cited References

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Butler et al disclose a rotary multiple switch device which functions as a connection between two incompatibly wired electrical components. Gierut et al disclose the use of a printed circuit board with parallel rows of pins that are selectively shunted by a shunt connector. Takai et al discloses an electrical connector arrangement with a receptacle for plugs and a switching arrangement common to the plug terminal connector arrays. Bianca et al (086) and (458) disclose the use of a shunting contact arrangement between selected contacts/terminals. Hashizawa et al disclose a connector device with a coupling type switch. Deters discloses an electrical connector jumper assembly. Scholz discloses the use of a switching arrangement in a circuit for controlling power delivered to a speaker.

Application/Control Number: 10/648,679

Art Unit: 2832

Reasons for Allowance

The following is an examiner's statement of reasons for allowance: The prior art does not teach the use of a terminal connection device including a jumper housing comprising a jumper circuit with a plurality of jumper inlets for providing electrical connection to the electrical outputs of voice coils and electrical jumper terminals extending from the jumper inlets and additionally a terminal switch, which is detachably mounted on the jumper housing, and the terminal switch including a terminal circuit electrically connected with the jumper terminals of the jumper circuit for selectively switching the voice coils between a series connection and a parallel connection. This basic combination of structural components is recited in applicants original claim 1. The remaining claims 2-23 are allowed for the same reasons as claim 1.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Summary

Claims 1-23 are allowed.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to James R. Scott whose telephone number is (571) 272-1999. The examiner can normally be reached on Monday-Friday 1-5 p.m..

Art Unit: 2832

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Elvin G. Enad can be reached on (571) 272-1990. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only.
